

# Martin Ström: The Bridge-BUILDER Between Ancient Wisdom and Modern Innovation

## Thought Leadership: AI as a Mirror

**AI as a Mirror, Not a Mind:**  
Martin posits that AI is a statistical prediction machine that reflects our consciousness and patterns back to us rather than possessing its own awareness.

### Professional Identity & Mission

**The Multi-Faceted "Fellow Human Being":**  
Martin balances roles as the CEO of interconnected, a Licensed Psychologist (CBT), and an experienced Meditation Teacher in the Tibetan Buddhist tradition.

### Core Mission:

To ensure that as machines become more capable, humans become more conscious, focusing on human flourishing in the age of AI.

**Academic Foundation:**  
Holds dual Master's degrees in Computer Science and Psychology, providing a rare technical and behavioral perspective on technology.

### Global Impact & Publications

**Trusted Corporate Advisor:**  
Over a decade of public speaking and advising global giants like Microsoft, IKEA, and McKinsey on mindful leadership.

**Published Author:**  
Co-author of three influential books: "Mind of the Leader," "One Second Ahead," and "I'm Sorry You Were Saying."

**Philanthropic Leadership:**  
Sits on the boards of three non-profits (Yeshin Norbu, FDCW, and CCRA) dedicated to bringing contemplative science into society.

### The Power of Reflection

Just as a mirror helps us see physical distortions, AI can help us see hidden patterns in our communication and biases, provided we guide it with wisdom.
